1. Introduction

Introduction

Epyt is a simple but nice theme for Beamer, with the following features:

Introduction

Epyt is a simple but nice theme for Beamer, with the following features:

- ▶ simple structure: with page numbers at footer, no head bar and side bar;

Introduction

Epyt is a simple but nice theme for Beamer, with the following features:

- ► simple structure: with page numbers at footer, no head bar and side bar;
- ► simple templates: displaying theorems with traditional inline style;

Introduction

Epyt is a simple but nice theme for Beamer, with the following features:

- ▶ simple structure: with page numbers at footer, no head bar and side bar;
- ▶ simple templates: displaying theorems with traditional inline style;
- ▶ simple colors: using only several foreground and background colors.

2. Enumerates

Ordered Lists

A Beamer theme consists of the following four parts:

Ordered Lists

A Beamer theme consists of the following four parts:

1. outer theme, with `\usebeameroutertheme`;

Ordered Lists

A Beamer theme consists of the following four parts:

1. outer theme, with `\usebeameroutertheme`;
2. inner theme, with `\usebeamerinnertheme`;

Ordered Lists

A Beamer theme consists of the following four parts:

1. outer theme, with `\usebeameroutertheme;`
2. inner theme, with `\usebeamerinnertheme;`
3. color theme, with `\usebeamercolortheme;`

Ordered Lists

A Beamer theme consists of the following four parts:

1. outer theme, with \usebeameroutertheme;
2. inner theme, with \usebeamerinnertheme;
3. color theme, with \usebeamercolortheme;
4. font theme, with \usebeamerfonttheme.

3. Mathmatics

Example

Example 1 Prove the following result:

$$\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = -\frac{3}{2}$$

Example

Example 1 Prove the following result:

$$\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = -\frac{3}{2}$$

Proof. Since $\sin 3x \sim 3x$ and $\ln(1 - 2x) \sim -2x$, we have

$$\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = \lim_{x \to 0} \frac{3x}{-2x} = -\frac{3}{2},$$

and we are done. $\square$
